## SUMMARY

Data Science graduate student with 3+ years of industry experience & seeking internship opportunities

## EDUCATION

**Master of Science, Data Science**, University at Buffalo, SUNY

Sep 2021-Jan 2023

Relevant course work: Numerical Maths, Statistical Data Mining, Data Model & Query Language, Probability Theory, Predictive Analytics, Machine Learning, Reinforcement Learning.

GPA: 3.92

**Bachelor of Technology, IIT Roorkee**, Industrial Engineering

May 2013-May 2017

## SKILLS

- **Languages** : Python, JavaScript, MATLAB, R, SAS
- **ML Tools** : Classification, Regression, Clustering, Tree Based Algorithms, Bagging & Boosting. Libraries: TensorFlow, Keras, PyTorch, and scikit-learn.
- **Data Management** : SQLite, MySQL, pandas, Numpy, Excel
- **Tools & Data analysis** : Data Visualization, Google OR Tools, Time Series Forecasting

## WORK EXPERIENCE

**Associate Data Science**, Merilytics, India

Apr 2020-Aug 2021

- Developed a **Demand forecast model** with 1800 SKUs for a major European EV supplier leveraging Time Series forecasting packages such as fb-prophet, neural prophet, and sequence 2 sequence neural networks. Reduced time taken for forecasting from 1 week to 4 hours.
- Created a heuristic based driver **scheduling algorithm** to incorporate driving, terminal, and regulatory constraints to produce a simulation of bills movement across 34 terminals for a long-haul trucking client.
- Delivered ~\$25 million annual savings by reducing ~2700 man hours weekly by automating property valuation. Built an Automated Valuation Model (**AVM**) using TensorFlow-based custom nearest-neighbor architecture to identify comparable properties to predict prices for 4 major property types: Residential, Office, Industrial, Retail.
- Collaborated with client on biweekly calls to deploy the **AVM** in the client's environment by establishing an end-to-end data pipeline, & refactoring using PEP guidelines.

**Senior Data Science Analyst**, Merilytics, India

Feb 2019-Apr 2020

- Built Sales Forecast Model using Keras for creating promotion strategy for an American online clothing chain.
- Utilized KNN for determining comparable real estate properties, incorporating weights for different features

**Research Intern**, Vidooly, India

Dec 2018-Jan 2019

- Developed several Keras models for classifying YouTube Thumbnails and established data pipeline for extracting thumbnails using YouTube API.

## PROJECTS

- **Time Series Forecasting** : Time Series Analysis, customer segmentation, and interactive dashboard for 100k orders from an e-commerce platform **Ongoing**
- **Resume Synchronization**: Managed 6 profile versions on a single spreadsheet to keep in sync and to avoid repetitive editing. Utilized Python, HTML, & CSS for formatting & rendering, and Excel for handling data. **Ongoing**
- **8 Ball Pool** : Predicted & visualized ball trajectories using OpenCV, & made preemptive optimal decisions
- **Smartphone Price Prediction** : Mined data from GSMArena and performed feature engineering by mapping Centurian Mark Score using fuzzy logic
- **Wildfires Analysis** : Visualized the clusters of different wildfires using geopandas, and predicted the Arson wildfire by performing EDA & appropriate feature engineering
- **Poultry Price Forecast** : Scraped 2 years of data using Selenium and built a Time Series forecast model
- **Grocery Clustering** : Clustered grocery items using kmeans for optimal positioning & proximity of similar items
- **Sentiment Analysis** : Used Glove Word Embedding (NLP) for analyzing sentiments from twitter

## ACCOMPLISHMENTS

**Achieved 99.76 Percentile** in the Joint Entrance Examination (All India exam with 1.4 million candidates)

**Achieved 98.98 Percentile** in eLitmus pH Test for Problem Solving
