EDUCATION

Master of Science, Data Science, University at Buffalo, SUNY

Sep 2021-Jan 2023

Relevant course work: Statistical Data Mining, Data Model & Query Language, Predictive Analytics, Machine Learning, Reinforcement Learning

GPA: 3.92

Bachelor of Technology, IIT Roorkee, Indian Institute of Technology, Roorkee

May 2013-May 2017

SKILLS

- **Languages** : Python, R, SAS
- **ML Tools** : Classification, Regression, Clustering, Tree Based Algorithms, Bagging & Boosting.
Libraries: TensorFlow, Keras, PyTorch, and scikit-learn.
- **Deep Learning & NLP** : LSTM, Transformers, CNN, YOLO, Word2Vec, TF-IDF, Topic Modelling, spaCy, NER
- **Data Management** : SQLite, MySQL, pandas, Numpy, Excel
- **Tools & Data analysis** : Version Control (git), Tableau, Time Series Forecasting, Data Visualization, Machine Learning Interpretability

WORK EXPERIENCE

Associate Data Scientist, Merilytics, India

Apr 2020-Aug 2021

Built an Automated Valuation Model (**AVM**) using TensorFlow-based custom nearest-neighbor architecture to identify comparable properties for 4 major property types.

- Delivered **~\$25 million annual savings** by reducing ~2700 man hours weekly by automating property valuation.
- Collaborated with client on biweekly calls to **deploy the AVM** in the client's environment by establishing an end-to-end data pipeline, & refactoring the code using PEP guidelines.

Developed a **Demand forecast model** with 1800 SKUs for a major European EV supplier

- Leveraged Time Series forecasting packages such as fb-prophet, neural prophet, & seq2seq neural nets.
- Reduced time taken for forecasting from 1 week to 4 hours with the automated pipeline.

Created a heuristic based driver **scheduling algorithm** to incorporate driving, terminal, & regulatory constraints.

- Automated driver scheduling, reducing the time taken from multiple days to 15 minutes.
- Produced a simulation of bills movement across 34 terminals for a long-haul trucking client.

Senior Data Science Analyst, Merilytics, India

Feb 2019-Apr 2020

- Built Sales Forecast Model using Keras for creating promotion strategy for an American online clothing chain.
- Developed an end-to-end data pipeline on Azure utilizing Azure functions to automate ETL.
- Utilized KNN for determining comparable real estate properties, incorporating weights for different features.

Research Intern, Vidooly, India

Dec 2018-Jan 2019

- Developed several Keras models for classifying YouTube Thumbnails and established data pipeline for extracting thumbnails using YouTube API.
- Managed company website, and social media to promote business.

Python Developer Internship, Modestreet, India

Sep 2017 Dec 2017

- Created a web app using Django & Three.js to make 3D human models with specific dimensions, to be used as a virtual mannequin for an online clothing store.

PROJECTS

- **Time Series Forecasting** : Time Series Analysis, customer segmentation, and interactive dashboard for 100k orders from an e-commerce platform. Ongoing
- **8 Ball Pool** : Predicted & visualized ball trajectories using OpenCV, & made preemptive optimal decisions.
- **Smartphone Price Prediction** : Mined data from GSMarena and performed feature engineering by mapping Centurian Mark Score using fuzzy logic
- **Poultry Price Forecast** : Scraped 2 years of data using Selenium and built a Time Series forecast model.
- **Clustered grocery items** using kmeans for optimal positioning & proximity of similar items.
- **Sentiment Analysis** : Used Glove Word Embedding (NLP) for analyzing sentiments from twitter.

ACCOMPLISHMENTS

Achieved 99.76 Percentile in the Joint Entrance Examination (All India exam with 1.4 million candidates).

Achieved 98.98 Percentile in eLitmus pH Test for Problem Solving.
